PROFESSIONAL SUMMARY

Aspiring Data Science graduate with practical experience in Python, SQL, and Machine Learning for data preprocessing, exploratory data analysis (EDA), and predictive modeling. Proficient in data cleaning, ETL pipelines, web scraping, and building interactive dashboards to deliver data-driven business insights. Seeking an entry-level Data Science Intern role to contribute technical expertise and solve complex business problems.

TECHNICAL SKILLS

Programming: Python, R, SQL, HTML

Data Analysis: Pandas, NumPy, Excel

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Database: MySQL

Web Scraping: BeautifulSoup, Playwright

Machine Learning: Scikit-learn, Deep Learning

Core Competencies: Data Preprocessing & Cleaning | Machine Learning & Predictive Modeling | Exploratory Data Analysis (EDA) | Statistical Analysis | SQL Querying & Data Extraction | ETL (Extract, Transform, Load) Processes | Data Visualization & Dashboard Development | Web Scraping & Data Collection | Technical Documentation & Collaboration | Data-Driven Decision Making

PROJECTS

Intelliwaste: AI-Based Waste Classification System | [CODE](#)

TECH STACK: Django, Python, ResNet50, CNN, JavaScript, HTML, CSS

- Built a real-time waste classification web application using Django and JavaScript.
- Trained and optimized a ResNet50 CNN model on 25,000+ images for accurate predictions.
- Integrated webcam and image upload features for live waste detection and classification.

IPL Performance Analytics Dashboard | [CODE](#)

TECH STACK: Python, Playwright, BeautifulSoup, Excel, Power BI

- Scraped and processed datasets from 75+ IPL matches (~10k+ records) using Playwright and BeautifulSoup.
- Cleaned and transformed datasets using Excel and Python for analysis.
- Built interactive Power BI dashboards to analyze player performance and team selection strategies.

Dehazing-and-Human-Detection | [CODE](#)

TECH STACK: Python, OpenCV, Deep Learning

- Developed a computer vision system using Python and OpenCV to enhance visibility in foggy environments.
- Implemented deep learning models for real-time human and animal detection.
- Improved object detection accuracy in low-visibility conditions by applying image dehazing techniques.

AI Chatbot for Food Ordering and Tracking | [CODE](#)

TECH STACK: Dialogflow, FastAPI, MySQL

- Built an AI chatbot using Dialogflow and FastAPI for automated food ordering and order tracking.
- Designed backend APIs integrated with MySQL database for order management.
- Implemented NLP-based intent recognition for improved user interaction.

EXPERIENCE

Web Development Intern – National Small Industries Corporation Ltd., Chennai

(02 | 2024 - 03 | 2024)

- Designed and deployed a responsive business website using HTML, CSS, JavaScript, cPanel, DNS, SSL, and email hosting.
- Developed and integrated MySQL databases with PHP/web applications for secure backend data management.
- Managed FTP file deployment, server maintenance, troubleshooting, and regular website content updates.

EDUCATION

B.Tech - Artificial Intelligence and Data Science,

Vel Tech High Tech Engineering college

2022 - 2026 | Chennai

CERTIFICATIONS

- Preparing data for analysis with Microsoft excel, **Microsoft**
- Harnessing the power of data with Power BI, **Microsoft**
- Extract, Transform and Load Data in Power BI, **Microsoft**
