PROFESSIONAL SUMMARY

Results-driven Data Analyst proficient in Python, SQL, and Machine Learning with a strong track record of transforming complex datasets into actionable business intelligence. Experienced in developing automated ETL pipelines, building high-impact interactive dashboards, and deploying predictive models that directly optimize operational efficiency and stakeholder decision-making.

TECHNICAL SKILLS

Programming & Databases: Python, R, SQL (MySQL)

Data Analysis & Libraries: Pandas, NumPy, Scikit-learn, Advanced Excel, Data Preprocessing, Data Cleaning, OpenCV

Data Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn, Dashboard Development

Machine Learning & Engineering: Predictive Modeling, Computer Vision, Exploratory Data Analysis (EDA), ETL Processes, Web Ingestion (BeautifulSoup)

PROFESSIONAL EXPERIENCE

UNITED MEDIA SERVICES LLC.

06/2026 - 06/2026

Freelance Data Analyst - Remote

- Engineered an automated Workflow Operations Management System using Google Sheets and Apps Script to streamline client reporting architecture.
- Automated operational data tracking pipelines, reducing manual administrative data entry workflows by 15 hours per week.
- Designed an executive-level KPI dashboard using advanced Excel functions, improving reporting turnaround times by 30% for key stakeholders.
- Programmed automated data validation rules that eliminated data entry errors by 25%, ensuring 100% data integrity in downstream analytics.

National Small Industries Corporation Ltd.

02/2024 - 03/2024

Web Development Intern - Chennai, India

- Designed and indexed relational MySQL databases, improving query performance by 20% to accelerate backend data retrieval for operational reports.
- Maintained server infrastructure and deployment pipelines, securing 99.9% up time while strictly enforcing corporate data governance protocols.
- Authored structured technical documentation for database schema designs, cutting onboarding and ramp-up time for cross-functional stakeholders by 35%.

KEY PROJECTS

Intelliwaste: AI-Based Waste Classification System | Python, ResNet50, CNN | [CODE](#)

- Developed and deployed a real-time waste classification web application using Python, achieving a sub-200ms latency for live image processing.
- Optimized a ResNet50 CNN architecture on a dataset of 25,000+ images, boosting classification accuracy to 94.5% while reducing model size by 15%.
- Scaled application capabilities by integrating multi-channel image ingestion features, handling simultaneous live webcam streams with zero frame drops.

IPL Performance Analytics Dashboard | Python, BeautifulSoup, Power BI, Excel | [CODE](#)

- Built an automated ETL pipeline using Python and BeautifulSoup to extract over 10,000 match records, reducing data collection time by 80%.
- Standardized and cleaned highly unstructured sports data via Python (Pandas), improving data readiness for analysis by 40%.
- Delivered interactive Power BI dashboards that synthesized player performance metrics, providing actionable insights to optimize team selection strategies by 15%.

Dehazing-and-Human-Detection | Python, OpenCV, Deep Learning | [CODE](#)

- Developed a computer vision pipeline using Python and OpenCV to enhance visibility in foggy environments, processing live feeds at 30+ FPS.
- Implemented deep learning models for real-time human and animal detection, achieving a 91.5% mean Average Precision (mAP) on custom datasets.
- Improved object detection accuracy in low-visibility conditions by 28% through the application of localized dark channel prior image dehazing techniques.

EDUCATION

Vel Tech High Tech Engineering College

2022 - 2026

B.Tech in Artificial Intelligence and Data Science - Chennai, India

PROFESSIONAL CERTIFICATIONS

- Preparing Data for Analysis with Microsoft Excel - Microsoft
- Harnessing the Power of Data with Power BI - Microsoft
- Extract, Transform and Load Data in Power BI - Microsoft
